PROGCON - CHAPTER 1

Corrected By: pa puyar

CLASS NUMBER:

SECTION: ACI92

NAME: SARTE, CHARLIZE MAY

DATE: NOV. 6,2019

PART 1: Identify the following.

Computer System 1. A combination of all the components required to process and store data using a computer.

Hard ware 2 The equipment or physical devices that are associated with a computer.

Software -3. The computer instructions that tell the hardware what to do.

Programs 4. The instruction sets written by programmers.

Application (of twares. A type of software such as word processing, spreadsheets, payroll and inventory, even games

Syntax emor 6 Errors in language or grammar.

Sy Stem Goffware 7. Software such as operating systems like Windows, Linux, or UNIX

8. Describes the entry of data items into computer memory using hardware devices such as keyboards and mice.

Input Symbol 9. Indicates an input operation and is represented by a parallelogram in flowcharts.

Input Cut put 10. Represented by a parallelogram in flowcharts.

Processing Julio Hems 11 May involve organizing them, checking them for accuracy, or performing calculations with them.

Processing Symbol 12 Indicates a processing operation and is represented by a rectangle in flowcharts.

Central Processing Unit 13. The hardware component that processes data.

Output

14 Describes the operation of retrieving information from memory and sending it to a device, such as a monitor or printer, so people can view, interpret, and use the results.

15 Indicates an output operation and is represented by a parallelogram in flowcharts.

Programming Language 16. Used to write computer instructions called program code; used to write programs.

Programming Language 17. Also includes languages such as Visual Basic, C#, C++, Java.

18. Grammar rules of a language.

Syntax error 19. Errors in language or grammar.

Recomplete Mary 20. The temporary, internal storage within a computer.

Non Volable numer Describes storage whose contents are retained when power is lost.

Interpreter 22. Translates a high-level language into machine language and tells you if you have used a programming language incorrectly.

Logical Errors 23. Errors in program logic produce incorrect output

Vaniable 29 A named memory location whose value can vary.

Users or 25. People who benefit from using computer programs.

Documentation 26. Consists of all the supporting paperwork for a program.

27. The sequence of steps necessary to solve any problem.

Dect - Cheeking 28. The process of walking through a program's logic on paper. Cofing the programming language instructions.

Logingatax terrors

30 When instructions are performed in the wrong order, too many times, or not at all.

Logical Errors 31. Errors in program logic produce incorrect output

32. Execute the program with some sample data to see whether the results are logically correct

33 What is the process of finding and correcting program errors?

Debugging Conversion 34. The entire set of actions an organization must take to switch over to using a new program or set of programs Maintenance.

35. Consists of all the improvements and corrections made to a program after it is in production.

PART 2: Enumeration

a. 3 major components of a computer system?

- b. 3 major computer hardware operations.
- c. 4 most common planning tools.
- d. 3 most common flowchart symbols.
- e. 7 steps on a program development life cycle.

a. I. Hard pare Software Application Software 3. stimming System Software e. I tenders tand the problem 2 Flom' the ligit b. Ituput 2. Write the code 3. Output 4 trains late the code intest the program C. Litternty Dragram + lowcharts

2 Free Diagram Pstendarde

2 Abortis Diagram IPU charts

4 texterelationship Dragram

1 output

2 protossing Symbol (Parallelagram)

2 protossing Symbol (Ectangle)

3 textend Symbol (Diamond) To Maintain the program
